

NutriHorse

Feeds
for all categories of horse

NutriHorse

Dear breeders,

We're pleased to introduce our innovated NutriHorse line of feeds for horses. We've always put the health and condition of your horses first and, based on our own findings and those of the wider scientific community, we constantly strive to innovate and perfect our feeds to make them better and more effective. We've gradually made the move from extruded feeds to müsli, and our experience with a Dutch producer of müsli has compelled us to add granular feeds to our product range. We believe that the select ingredients and Dutch technology put these feeds at the top of their category. In order to maintain the quality of our products, we're using entirely new packaging, which extends the shelf life to 12 months and preserves flavour and freshness for the entire time.

CONSULTATION

Not sure what feed or supplement to use? Need advice on serving size or serving method? You'll find answers to these questions and others at www.nutrihorse.cz under the section YOUR QUESTION.

PRODUCTS

Hobby

Basic low-energy granules for excellent condition
For horses and ponies in maintenance or with light energy demands

- excellent quality-to-price ratio
- balanced content of all essential vitamins and minerals
- granule size: 10 mm

NutriHorse Hobby is a basic low-energy granular feed with an excellent quality-to-price ratio. It contains all essential nutrients, including vitamins, minerals, and trace elements. The increased fibre content is primarily suitable for horses and ponies with light energy demands, i.e., animals intended for recreational riding and light work as well as for those in maintenance or convalescence.

Composition: barley, oat husks, wheat middlings, alfalfa, flaxseed, feed wheat flour, sunflower, sunflower husks, cane molasses, flax expellers, calcium carbonate, sodium chloride, monocalcium phosphate, sunflower oil, magnesium oxide

Analytical constituents in 1 kg: crude protein 11.5%; crude oils and fats 5.0%; crude fibre 13.5%; crude ash 7.5%; sodium 0.45%; starch 24%, sugars 4%

Nutritional additives in 1 kg – vitamins: vit. A 18 000 IU; vit. D3 2 000 IU; vit. E 200 mg
Microelements: iron 75 mg; iodine 1.5 mg; copper 19 mg; manganese 55 mg; zinc 124 mg; selenium 0.4 mg

Energy: 10,7 MJ/kg

Package size: 20 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Maintenance	0.7	1.3	2
Light energy demands	0.8	1.7	2.5

Classic

Oat-free low-energy müsli

For horses and ponies in maintenance or with light energy demands

- oat-free
- excellent quality-to-price ratio
- balanced content of all essential vitamins and minerals

NutriHorse Müsli Classic is a tasty and affordable müsli containing all essential nutrients, including vitamins, minerals, and trace elements, for horses and ponies with light energy demands, i.e., animals intended for recreational riding and light work as well as for those in maintenance or convalescence. Its composition supports physical condition and health.

Composition: barley flakes, corn flakes, sunflower husks, barley, puffed barley, dried apple pomace, alfalfa, wheat middlings, cane molasses, pea flakes, carrot flakes, sunflower, calcium carbonate, sodium chloride, feed wheat, flax expellers, monocalcium phosphate, brewer's yeast, flaxseed, magnesium oxide, potato starch

Analytical constituents in 1 kg: crude protein 9.5%; crude oils and fats 2.8%; crude fibre 9.9%; crude ash 5.5%; sodium 0.5%; starch 40%; sugars 4.5%

Nutritional additives in 1 kg – vitamins: vit. A 18 400 IU; vit. D3 1 120 IU; vit. E 200 mg
Microelements: iron 61 mg; iodine 1.2 mg; copper 16 mg; manganese 47 mg; zinc 100 mg; selenium 0.3 mg

Energy: 10,4 MJ/kg

Package size: 15 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Maintenance	0.7	1.3	2
Light energy demands	0.8	1.7	2.5

Adult Grain Free

Modern healthy low-starch, low-sugar müsli
For horses and ponies with predisposition to obesity

- grain-free
- low-starch (6.2%), low-sugar (3.4%)
- high fibre content

NutriHorse Müsli Adult is a specially developed grain-free müsli with high fibre content and added timothy, which contains small quantities of fructans. It is intended for horses and ponies prone to obesity and predisposed to insulin resistance, which increases the risk of laminitis.

Composition: alfalfa, sunflower husks, sunflower, dried apple pomace, chicory pulp, timothy, pea flakes, sweet lupine, flax oil, potato starch, monocalcium phosphate, sodium chloride, calcium carbonate, sunflower oil, flax expellers, magnesium oxide

Analytical constituents in 1 kg: crude protein 13.2%; crude oils and fats 4.3%; crude fibre 27.6%; crude ash 8.1%; sodium 0.5%; starch 6.2%; sugar 3.4%

Nutritional additives in 1 kg – vitamins: vit. A 14 000 IU; vit. D3 3 500 IU; vit. E 135 mg
Microelements: iron 58 mg; iodine 2.0 mg; copper 15 mg; manganese 46 mg; zinc 97 mg; selenium 0.3 mg

Energy: 8,5 MJ/kg

Package size: 15 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Maintenance	0.7	1.3	2
Light energy demands	0.8	1.7	2.5

Profi

Performance granules

For sport horses and racehorses with high energy demands

- added magnesium
- increased levels of natural vitamin E and selenium to protect muscles
- granule size: 10 mm

NutriHorse Profi is a high-energy granular feed for sport horses and racehorses with increased energy demands. Various sources of energy, such as starch grains and sunflower oil, ensure the proper balance between fast-release and slow-release energy. Added magnesium improves the ability of horses to focus on performance. Natural vitamin E and selenium are effective antioxidants that protect and support working muscles.

Composition: feed wheat, barley, oat hulls, flaxseed, sunflower, feed wheat flour, calcium carbonate, monocalcium phosphate, wheat middlings, sodium chloride, magnesium oxide, sunflower oil

Nutritional additives in 1 kg – vitamins: vit. A 20 000 IU; vit. D3 2 200 IU; vit. E 350 mg **Microelements:** iron 101 mg; iodine 2.0 mg; copper 26.5 mg; manganese 79 mg; zinc 166 mg; selenium 0.5 mg

Energy: 13,5 MJ/kg

Package size: 20 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Moderate energy demands	0.9	1.8	2.7
High energy demands	1.2	2.4	3.6

Performance Control

Oat-free high-energy müsli

For sport horses and racehorses with high energy demands

- oat-free
- optimal combination of fast-release and gradual-release energy
- puffed grains

NutriHorse Müsli Performance Control is a top-end feed for sport horses that require sufficient energy for maximum performance. It contains an optimal balance of fast-release and gradual-release energy, which ensures the proper supply of energy for performance. Hydrothermal processing of grains (flaking and puffing) increases their digestibility and usability in the digestive tract.

Composition: barley flakes, corn flakes, sunflower, wheat middlings, puffed barley, puffed corn, sunflower husks, alfalfa, sunflower oil, pea flakes, flax expellers, soy, cane molasses, calcium carbonate, sodium chloride, feed wheat, carrot flakes, monocalcium phosphate, flaxseed, brewer's yeast, magnesium oxide, barley, potato starch

Analytical constituents in 1 kg: crude protein 13.2%; crude oils and fats 7.0%; crude fibre 9.7%; crude ash 8.1%; sodium 0.6%; starch 32%; sugars 4.4%

Nutritional additives in 1 kg – vitamins: vit. A 27 600 IU; vit. D3 1 680 IU; vit. E 300 mg
Microelements: iron 91 mg; iodine 1.8 mg; copper 24 mg; manganese 71 mg; zinc 150 mg; selenium 0.4 mg

Energy: 14,5 MJ/kg

Package size: 15 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Moderate energy demands	0.9	1.8	2.7
High energy demands	1.2	2.4	3.6

Müsli Breeder

Essential müsli for all breeders

For foals, young horses, and pregnant and nursing mares

- optimal condition of mares
- maximum lactation
- ensures required growth in foals and young horses

NutriHorse Müsli Breeder is a quality feed for pregnant and nursing mares that ensures proper foetal growth and subsequent lactation. Sufficient milk production is the basis for the successful rearing of foals. Because foals become accustomed to NutriHorse Müsli Breeder while still with the mother, continued feeding with the appropriate serving size is very easy. Good health as a foal is critical to the future career of a quality sport horse.

Composition: timothy, barley flakes, sunflower, alfalfa, corn flakes, soy, wheat middlings, puffed barley, puffed corn, pea flakes, sunflower husks, sunflower oil, cane molasses, calcium carbonate, feed wheat, sodium chloride, flax expellers, flaxseed, monocalcium phosphate, barley, brewer's yeast, magnesium oxide

Analytical constituents in 1 kg: crude protein 14.0%; crude oils and fats 7.0%; crude fibre 12.0%; crude ash 9.5%; sodium 0.65%; starch 23%; sugars 5%

Nutritional additives in 1 kg – vitamins: vit. A 28 750 IU; vit. D3 1 750 IU; vit. E 312.5 mg
Microelements: iron 95 mg; iodine 1.8 mg; copper 25 mg; manganese 74 mg; zinc 156 mg; selenium 0.5 mg

Energy: 13,5 MJ/kg

Package size: 15 kg

Daily serving size for mares in kg:

Horse weight in kg	400	500	600
3/3 gestation	1.8	2.25	2.7
1/2 lactation	2.4	3	3.6
2/2 lactation	1.8	2.25	2.7

Daily serving size for foals in kg:

Age (in months)	Adult horse weight in kg		
	200	400	600
2-6 mos.	0.5	1	1.5
6-12 mos.	1	2	3
12-18 mos.	0.75	1.5	2
18-24 mos.	0.5	1	1.5

Senior

Oat-free müsli with antioxidants to slow the effects of ageing
For older horses

- oat-free
- special combination of all essential vitamins and minerals
- extra vitamin C and E for slower ageing

NutriHorse Müsli Senior is a specially formulated feed for ageing horses. Quality ingredients and gentle processing ensure optimal digestibility and usability of essential nutrients for ageing horses. Increased levels of vitamins, trace elements, and antioxidants slow the effects of ageing and allow horses to live out a longer and higher-quality retirement with their keepers. .

Composition: timothy, sunflower, barley flakes, corn flakes, sunflower husks, soy, alfalfa, pea flakes, wheat middlings, cane molasses, dried apple pomace, flax oil, calcium carbonate, feed wheat, sodium chloride, flax expellers, flaxseed, monocalcium phosphate, barley, brewer's yeast, magnesium oxide, sunflower oil, potato starch

Analytical constituents in 1 kg: crude protein 13.6%; crude oils and fats 4.8%; crude fibre 17.0%; crude ash 8.6%; sodium 0.6%; starch 19%; sugars 5.3%

Nutritional additives in 1 kg – vitamins: vit. A 23 000 IU; vit. D3 1 400 IU; vit. E 250 mg; vit. C 80 mg
Microelements: iron 76 mg; iodine 1.5 mg; copper 20 mg; manganese 60 mg; zinc 125 mg; selenium 0,4 mg

Energy: 12,0 MJ/kg

Package size: 15 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Serving size	0.7	1.3	2

Herbs

Herbal müsli for respiratory support For horses with respiratory problems

- tasty and healthy müsli
- special blend of herbs
- low-starch, low-sugar

NutriHorse Müsli Herbs is an exceptional feed containing select herbs to support respiration in horses. It boosts the body's natural immunity, has a positive effect on the bronchial tubes, and acts as an expectorant. For maximum effect, mix the müsli with hot water, let it cool to approximately 42 °C, and allow the horse to inhale the steam while eating.

Composition: barley flakes, flaked flaxseed, sunflower husks, wheat bran, dried apple pomace, corn flakes, pea flakes, cane molasses, parsley, carrot flakes, marigold, rose hip, flax expellers, basil, rosemary leaves, fennel seeds, mint leaves, nettle leaves

Analytical constituents in 1 kg: crude protein 11.7%; crude oils and fats 8.4%; crude fibre 15.5%; crude ash 3.8%; sodium 0.1%; starch 21%; sugar 6%

Energy: 12,0 MJ/kg

Package size: 12.5 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Serving size	0.3	0.7	1

Mash

A warm supplement with herbs for regeneration
For all horses and ponies

- tasty and healthy feed with added herbs
- accelerates regeneration following intensive training or illness
- easy preparation

NutriHorse Mash is a tasty feed with beneficial dietetic effects. Wheat bran supports intestinal and digestive health. The high content of flaxseed helps maintain a beautiful and shiny coat. Mash is primarily intended for horses in convalescence following illness or surgery. It is also ideal for sport horses requiring fast regeneration after intensive training. It is ideal during shedding and in winter.

Composition: wheat bran, flaked flaxseed, barley flakes, corn flakes, dried apple pomace, chicory pulp, cane molasses, calcium carbonate, herbs

Analytical constituents in 1 kg: crude protein 12.5%; crude oils and fats 10.0%; crude fibre 9.0%; crude ash 6.0%; sodium 0.15%; starch 26%; sugars 5%

Energy: 12,5 MJ/kg

Package size: 12.5 kg

Daily dose in kg:

Horse weight in kg	200	400	600
Serving size	0.4	0.8	1.2

Mix 1 part mash with 1 part hot water.
Allow to cool before serving.
